

Atlanta Firm Working to Fill the Gap of 2.7 Million Vacant Cybersecurity Jobs

CLASS LLC Conducts Masterclass to Equip Board Directors and Executives

For Immediate Release

Atlanta, GA: Cyber Leadership and Strategy Solutions (CLASS-LLC), a cybersecurity service firm, is conducting multiple 8 week Cyber Executive Masterclasses.

According to CSOonline (April 2022), there are still 2.72 million unfilled positions that need individuals with the appropriate cybersecurity skills. At the executive level, the Securities and Exchange Commission (SEC) continues to focus on the need for competent security expertise on boards and with senior management.

Keyaan J. Williams, founder and Managing Director CLASS-LLC, explains one of his company's missions, "Companies cannot achieve security with technology alone. We are aware of the profound need for qualified people at all levels to defend against an ever-increasing volume of global cyber-attacks."

Williams continues, "There are numerous training programs and classes available for people transitioning into this industry, for those continuing to advance their credentials, and to hone their existing competencies. CLASS-LLC is dedicated to a higher level of training that focuses more on the practice of cybersecurity than the theory and dated practices that other programs address."

"This masterclass is different in that it blends security and privacy in a way that is relevant to the modern world and workplace. The class combines elements of the CCISO course from EC-Council and the CIPM course from IAPP. Students in the course get exclusive access to continually updated material, recorded lectures, and weekly mastermind discussions to ensure their success in the program and beyond. Post-course certification examinations are available for either CCISO, CIPM, or both based on the needs of the student. We are confident that this course is one of the best ways to get into the cybersecurity field or simply refresh your existing knowledge about security, strategy and privacy."

Darren Chin, Consultant, Cyber Security & Risk at CDW Canada

"Beyond the comprehensive curriculum, the real value from participation in CEM is the insights shared by Keyaan and your peers on how to ensure that security and business concerns alike can be addressed in the most effective manner."
