

# Williams Contributes Chapter for Mark Miller's Book *Modern Cybersecurity: Tales from the Near-Distant Future*

## **For Immediate Release**

**Mark Miller's** collaborative compilation book, *Modern Cybersecurity: Tales from the Near-Distant Future*, launched featuring seven authors with practical in-field experience who write about how to achieve improved cybersecurity and risk outcomes.

Mark Miller is recognized internationally as a Senior Storyteller, weaving engaging tales to simplify the explanation of complex, technological solutions. Mark speaks and writes extensively on DevOps and DevSecOps. Miller announces, "The best lessons come from experience. Every story in this book was written by a practitioner who tested the theories they are presenting, crashed and burned in their application of those theories, and came out the other side with a vision on what the near-future of cybersecurity will look like."

*Modern Cybersecurity* provides roadmaps to move your cybersecurity program forward, guidance to improve the development of security strategy and teams, and steps to follow to connect security outcomes with business objectives.

Keyaan Williams is the Founder/Managing Director of Cyber Leadership and Strategy Solutions (CLASS-LLC). His chapter Metrics that Matter: The Business Context of Cyber Risk Management covers the framework, information, and context required to enhance the value of security metrics, which help communicate relevant information that the board and management can use to make informed decisions about managing cybersecurity risk.

An MBA and JMT Certified Team Member, Keyaan followed a unique path to becoming a risk leader. He served in the U.S. Army as a chemical weapons specialist and later worked for more than a decade in various IT and security roles at the Centers for Disease Control and Prevention (CDC) in Atlanta. His company, CLASS-LLC is a cybersecurity and business services firm focused on strategy consulting for public and private company boards as well as data privacy, risk management, and cybersecurity advisory for global companies. Through their workforce development programs, CLASS-LLC endeavors to develop the best cybersecurity knowledge, skills, and abilities for everyone entry-level professionals to senior executives.

## **Chapters and Authors**

- *Security for Modern Cyber Assets* - Sounil Yu (JupiterOne)
