

# As Business Moves Forward after the Massive Shift to Digital Focused Operations due to the Pandemic, Fear of Data Privacy and Security Come to the Forefront

*30 of the Top Cyber Security Minds Come Together to Discuss Strategy, Business Resilience and the Path Forward*

## For Immediate Release

**Atlanta, GA:** Cyber Leadership and Strategy Solutions (CLASS-LLC) is hosting a Cyber Strategy Retreat online July 22 -24, 2020.

“As businesses across the country, in fact the world, shifted to digital operations, executives and management teams became acutely aware of the weaknesses in their cyber security. Businesses realized their vulnerability to breaches compromising data privacy and their lack of solid strategy as it pertains to risk management,” explains Keyaan Williams, founder of CLASS-LLC, a leader in cyber strategy and solutions. “I have spent over 15 years developing security programs that help organizations achieve their business goals, while managing cybersecurity risks at an acceptable level. But as businesses moved to digital operations due to COVID-19, the need to share this knowledge has never been more pivotal.”

The Cyber Strategy Retreat brings together a network of global leaders and subject matter experts in business, technology, and security to discuss cybersecurity strategy. What differentiates this retreat from other virtual events of this type is access. First, the featured top speakers experts discussing up-to-the-minute topics, then followed by Roundtable breakouts hosted by a variety of business leaders with varying perspectives. Nowhere else is this format being done and the value will be immense in terms of information sharing and networking opportunities during these Roundtable sessions. Executives, technology management, risk management, and cybersecurity management will be shoulder to shoulder (screen to screen) in dialogue sharing best practices, solutions, and strategy.

“The Cyber Strategy Retreat is for those who want to go beyond compliance-driven programs and explore more strategic concerns related to cybersecurity and risk management,” continues Williams.

CSR2020 features a line-up of three great keynote sessions, six featured presentations, and nine breakout sessions. Our participants have an opportunity to connect with the speakers, sponsors, and other participants in our speaking sessions, roundtable discussions, and in the virtual show floor. To learn more about the retreat and to register go to [www.cyberstrategyretreat.com](http://www.cyberstrategyretreat.com).

**About CLASS-LLC:** CLASS-LLC is a cybersecurity and business services firm. It is not a technology company, but aligns with strategic partners to develop comprehensive solutions. CLASS-LLC uses professional certification workshops and custom-developed training to develop the cybersecurity capabilities of the entire workforce, from general computer users to senior executives.
