

Cyber Leadership and Strategy Solutions’ Cyber Career Foundations Program Jumpstarts Cyber Careers

For Immediate Release

Atlanta, GA: On Monday, September 28 Cyber Leadership and Strategy Solutions (CLASS-LLC) launches the next session of their Cyber Career Foundations Class.

Founder/President, Keyaan J. Williams, MBA explains, “What differentiates this training program from others in the industry is we believe that training and certifications alone will not set you apart in the industry. In fact, what we hear from countless hiring managers is that they are looking for candidates with hands-on experience. Our Foundations program delivers the combination of education, experience, mentoring and networking that will gets our trainees started on the path towards a career in cybersecurity.”

“Our cyber career programs are built on 4 cornerstones: Education and Certification, Career Mentoring, Professional Networking, and Hands-on Work Experience. Everyone knows someone who wants to break into cybersecurity. Our team has created a program that breaks the status quo and develops the whole person.”

The volume and sophistication of cyber attacks continues to increase. As these activities on the web continue to grow, the demand for qualified people to conquer those attacks also increases. Employers are on the continuous lookout for cybersecurity technicians and experts. The demand for these professionals is growing 12 times faster* than the overall job market. In 2019, approximately 300,000 American cybersecurity positions went unfilled; by 2022, analysts project* that number could grow to 1.8 million. “This is an excellent time to train for a career in cybersecurity,” Williams continues.

About CLASS-LLC: CLASS-LLC is a cybersecurity and business services firm. It is not a technology company, but aligns with strategic partners to develop comprehensive solutions. CLASS-LLC uses professional certification workshops and custom-developed training to develop the cybersecurity capabilities of the entire workforce, from general computer users to senior executives. <https://class-llc.com/>

About Keyaan Williams: Keyaan is Founder and Managing Director of CLASS-LLC. He’s dedicated over two decades to corporate information security and risk management programs. He’s served as the Sr Manager Global Information Security with DB Consulting Group working to build the program that standardized information security, risk management, and compliance practices across 46 country offices in Africa, Asia, and the Americas for the Global Aids Program at the Centers for Disease Control and Prevention (CDC). This stemmed from his service as the Dir of Information Security (ISSO) at the CDC Center for Surveillance, Epidemiology, and Laboratory Services (CSELS) where he directed all aspects of information security, compliance, and risk management.

Keyaan established his reputation for executive leadership as President of the International Board of Directors who led the Information Systems Security Association (ISSA) through its organizational transformation. He serves as the chair of the risk committee for a global non-profit and is a founding member of the Atlanta Chapter of the Private Directors Association. Keyaan has been recognized for his service in the U.S. Army Chemical Corps where he provided chemical ops leadership at a variety of command levels as a Chemical Weapons Specialist.
